

Coffee Shop Sales

Executive summary and dashboard overview

Coffee Shop Sales Analysis

Built in Microsoft Excel using PivotTables, PivotCharts, slicers and formulas

\$698,812.33
Total Sales

149,116
Transactions

\$4.69
Average Order Value

1.44
Items per Transaction

Project Objective

Analyze coffee shop transaction data to identify sales trends, peak demand periods, product performance and store-level opportunities that can improve revenue and operational decisions.

Monthly Performance

Month	Sales Revenue	Transactions
January	\$81,677.74	17,314
February	\$76,145.19	16,359
March	\$98,834.68	21,229
April	\$118,941.08	25,335
May	\$156,727.76	33,527
June	\$166,485.88	35,352

Questions and Answers

Seven business questions answered from the transaction data

1. How do sales vary by day of the week and hour of the day?

Daily revenue remains close to \$100,000. Monday recorded \$101,677.28, Friday \$101,373.00 and Thursday \$100,767.78. Saturday was the weakest day at \$96,894.48. Hourly demand rises from 6,865 units at 6 AM to 25,197 at 8 AM, 25,370 at 9 AM and 26,713 at 10 AM, then declines after 11 AM.

2. Are there any peak times for sales activity?

Yes. The main peak is 8:00 AM-10:59 AM. The strongest hour is 10 AM, with 26,713 items, 18,545 transactions and \$88,673.39 in revenue. The next strongest hours are 9 AM and 8 AM.

3. What is the total sales revenue for each month?

January: \$81,677.74; February: \$76,145.19; March: \$98,834.68; April: \$118,941.08; May: \$156,727.76; June: \$166,485.88. June was highest and February was lowest. Revenue increased by about 103.8% from January to June.

4. How do sales vary across different store locations?

Hell's Kitchen led with \$236,511.17 from 50,735 transactions. Astoria generated \$232,243.91 from 50,599 transactions. Lower Manhattan generated \$230,057.25 from 47,782 transactions. Store performance is balanced, but Lower Manhattan has fewer transactions.

5. What is the average order value?

The average order value is \$4.69, and customers purchase an average of 1.44 items per transaction. This low basket size shows that bundles, size upgrades and add-on selling are strong opportunities.

6. Which products are best-selling by quantity and revenue?

By quantity, the leaders are Brewed Chai Tea (26,250), Gourmet Brewed Coffee (25,973) and Barista Espresso (24,943). By revenue, the leaders are Barista Espresso (\$91,406.20), Brewed Chai Tea (\$77,081.95), Hot Chocolate (\$72,416.00), Gourmet Brewed Coffee (\$70,034.60) and Brewed Black Tea (\$47,932.00).

7. How do sales vary by product category and type?

Coffee leads with \$269,952.45 in sales and 89,250 units. Tea follows with \$196,405.95 and 69,737 units. Bakery contributes \$82,315.64, while Drinking Chocolate contributes \$72,416.00. Barista Espresso is the top revenue product type, while Brewed Chai Tea leads in quantity.

Recommendations to Grow Coffee Sales

Action plan prioritized by business impact and ease of execution

1

Build morning bundles around the peak window

Run breakfast bundles from 8 AM to 11 AM, such as Barista Espresso plus a bakery item or Gourmet Brewed Coffee plus a scone. This directly targets the low 1.44-item average basket.

2

Use product-specific upselling

Train staff and use point-of-sale prompts to recommend a bakery item with coffee and tea orders. Even a small increase in items per transaction can raise revenue without adding customers.

3

Protect inventory and staffing from 8 AM to 11 AM

Schedule the strongest team during the morning rush and keep extra stock of espresso, chai, hot chocolate and popular bakery items. Slow service or stockouts during peak hours will directly reduce sales.

4

Improve weak evening demand

Test a 5 PM-to-close offer such as a discounted second drink, coffee-and-dessert bundle or loyalty bonus. Evening quantity falls sharply after 6 PM and reaches only 880 units at 8 PM.

5

Replicate Hell's Kitchen practices

Hell's Kitchen leads revenue. Compare its product mix, staffing, service speed and promotions with the other stores, then copy only the practices that are actually producing the difference.

6

Focus marketing on proven winners

Promote Barista Espresso, Brewed Chai Tea, Gourmet Brewed Coffee and Hot Chocolate on menu boards, loyalty rewards and digital channels. Do not give equal space to low-contribution categories.

7

Raise average order value carefully

Use size upgrades, flavor-shot add-ons and bundles instead of blanket discounts. The objective is a larger and more profitable basket, not simply cheaper sales.

Priority action

Start with morning bundles and staff upselling. These actions are directly supported by the 8 AM-11 AM peak and the low 1.44-item average basket.
